

Assignment No 4

Problem Statement:

Design and develop custom Application (Mini Project) using Sales force Cloud..

Objective:To Study ,Design and develop custom Application (Mini Project) using Sales force Cloud..

Theory:Design and develop custom Application (Mini Project) using Salesforce Cloud Step-1: Click on Lightning Experience. Step-2: Click on Setup. Step-3: Click on Create, Select Custom Object/Create Object. Step-4: Fill the Given Fields,

Label: comment,

Plural label: comments,

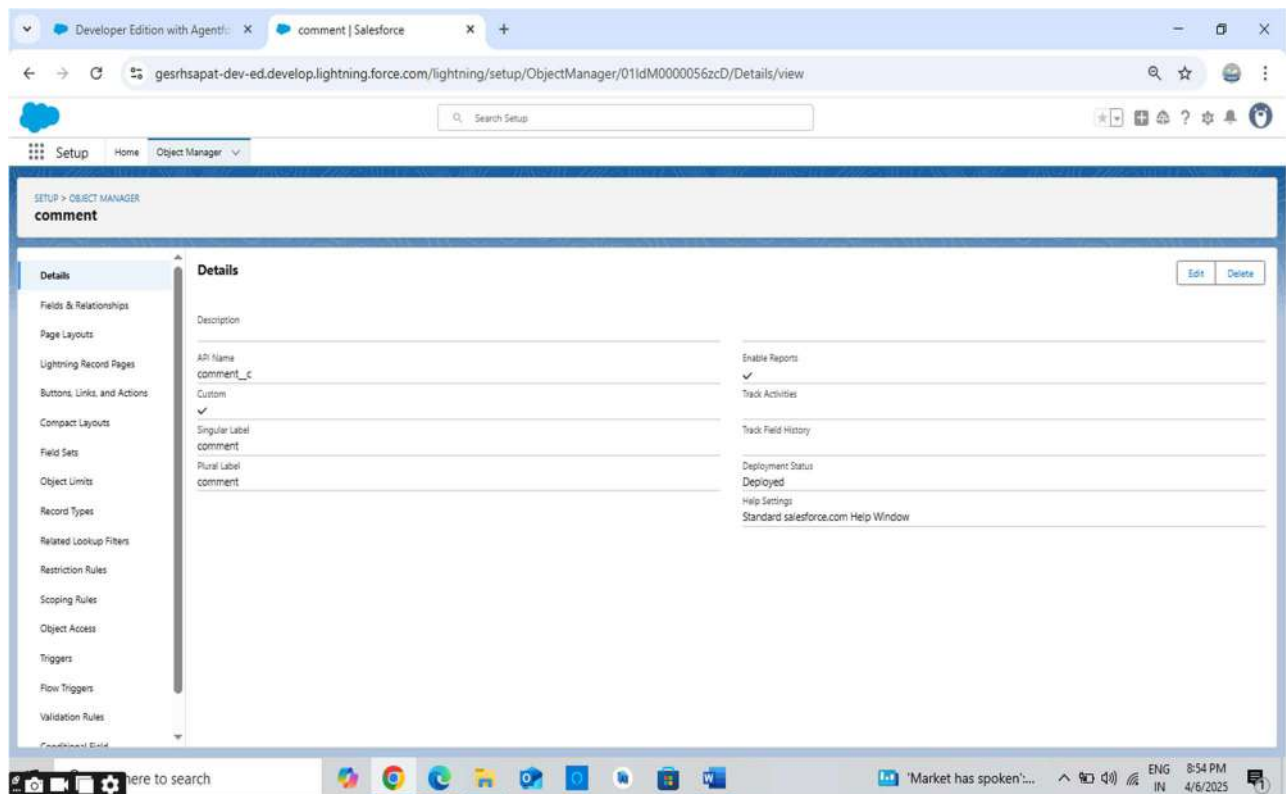

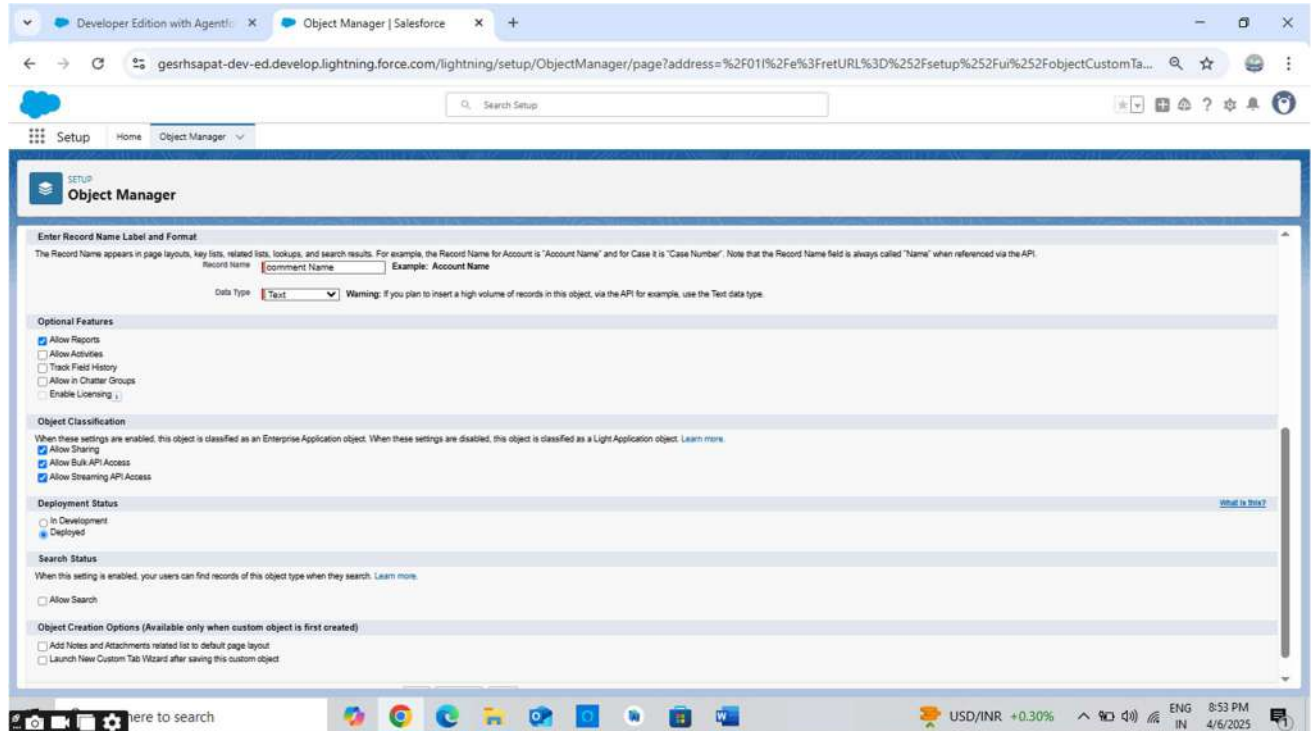

Data type: text,

Select Allow Reports Check Box, Click on Save.

The screenshot displays the 'New Custom Object' page in the Salesforce Object Manager. The page is titled 'New Custom Object' and includes a 'Custom Object Definition Edit' section. The 'Custom Object Information' section contains the following fields:

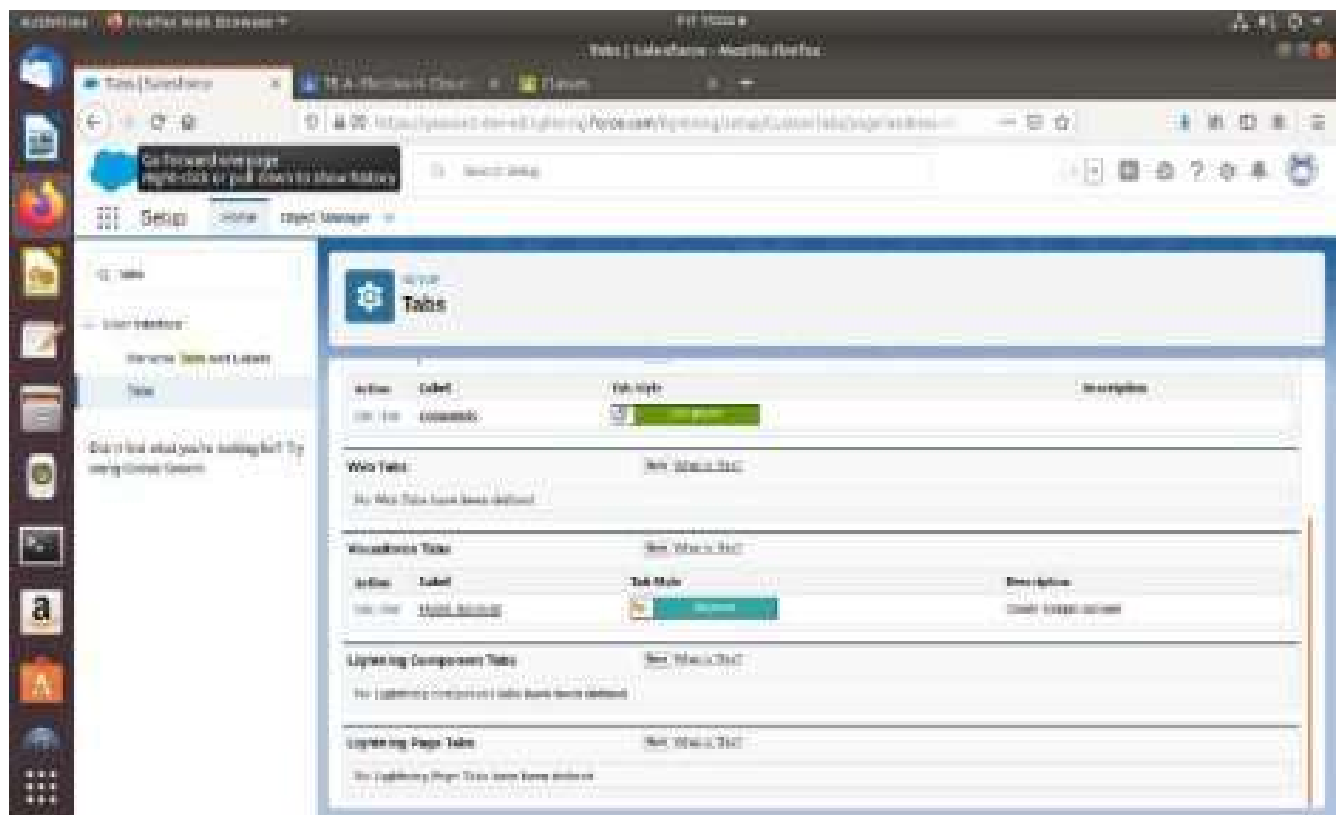

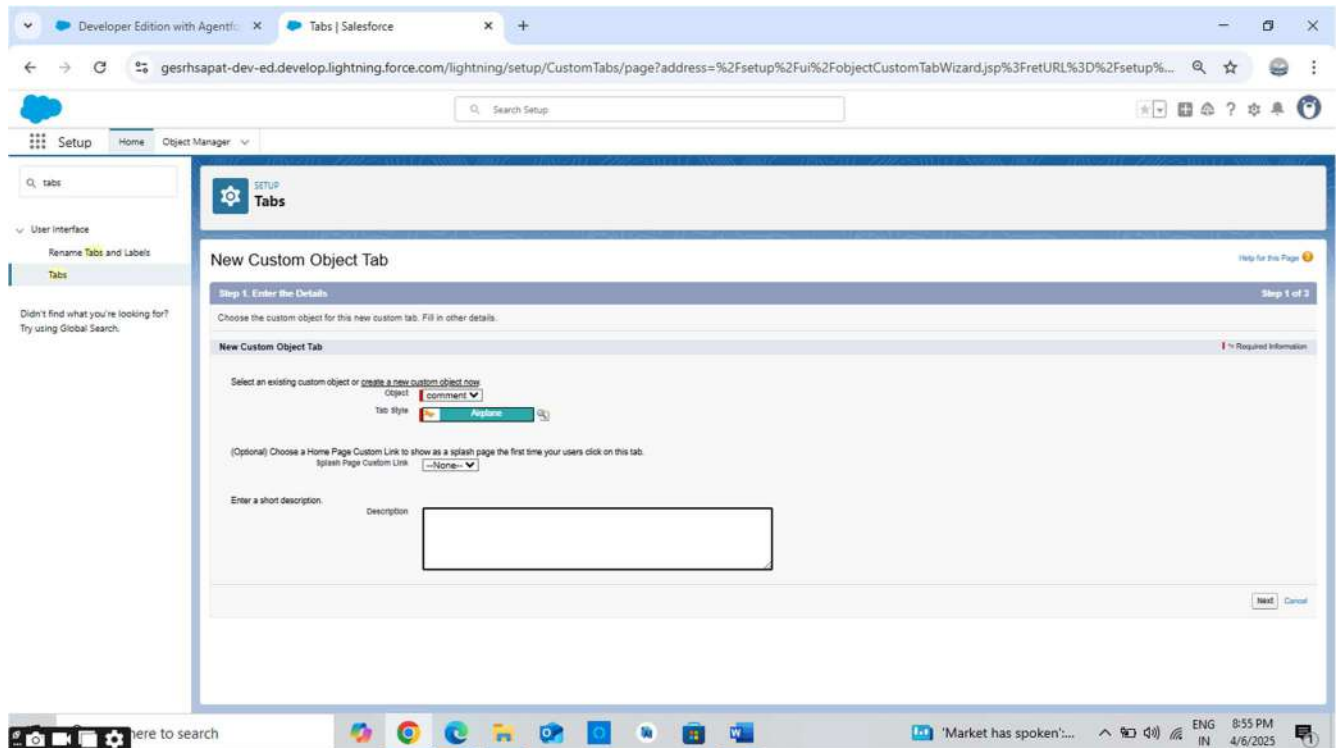

- Label:** comment (Example: Account)
- Plural Label:** comments (Example: Accounts)
- Starts with vowel sound:** ☐
- Object Name:** comment (Example: Account)
- Description:** (Empty text area)
- Context-Sensitive Help Setting:** ☒ Open the standard Salesforce.com Help & Training window, ☐ Open a window using a Visualforce page
- Content Name:** Name

The 'Enter Record Name Label and Format' section is partially visible at the bottom, showing the 'Record Name' field with the value 'comment Name' (Example: Account Name) and the 'Data Type' set to 'Text'. A warning message states: 'Warning: if you plan to insert a high volume of records in this object, via the API for example, use the Text data type.'

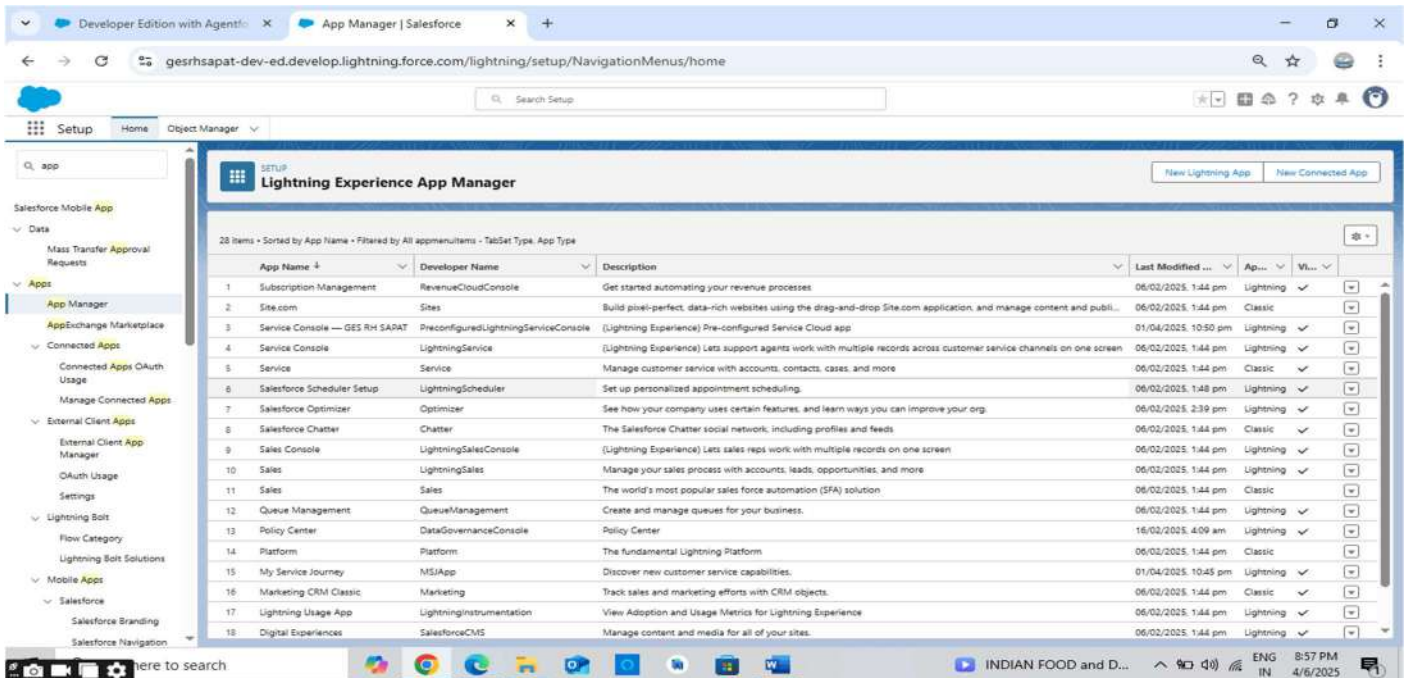

Step-5: Go to Home.

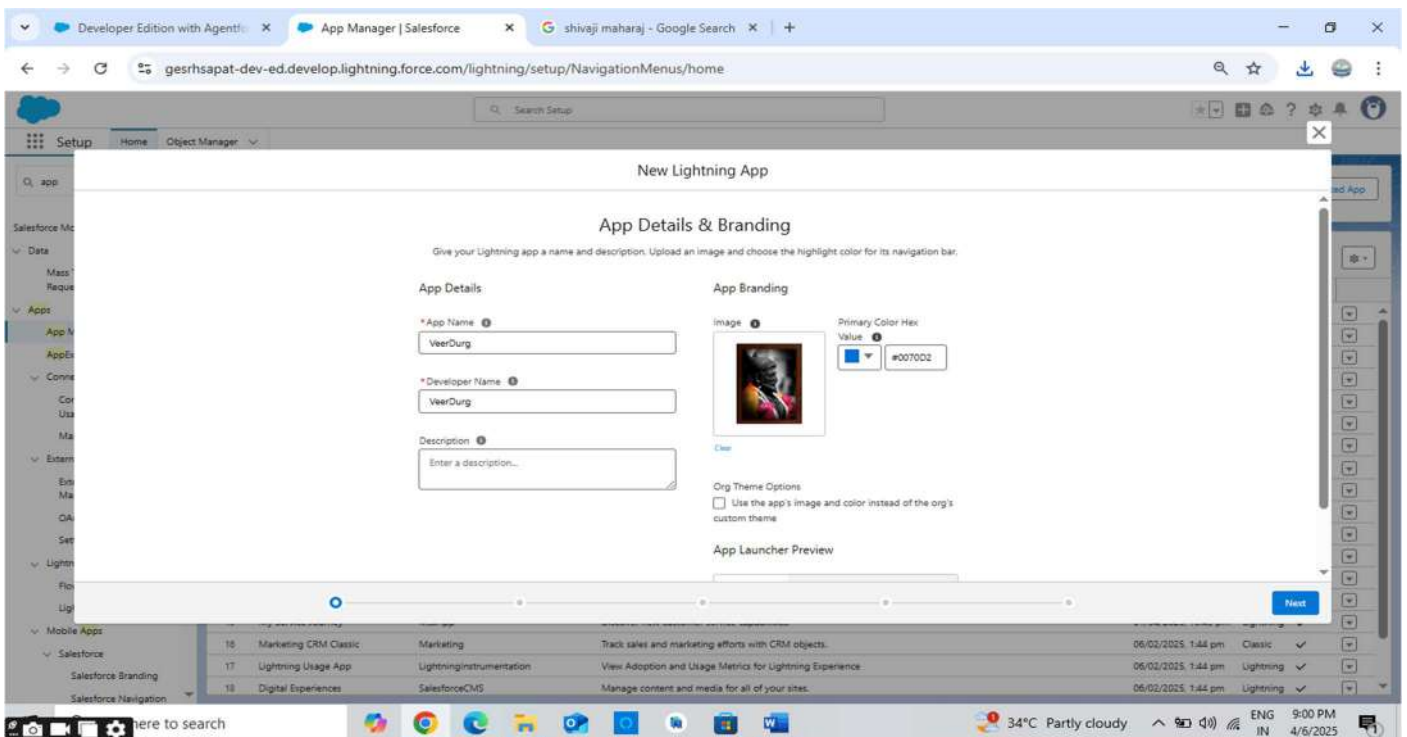

Step-6: Click on Setup, Click on Create, Select Custom Tabs.

Step-7: For Object Select Comment,
For Tab Style Select Any Icon,
Click-Next-Next-Save.

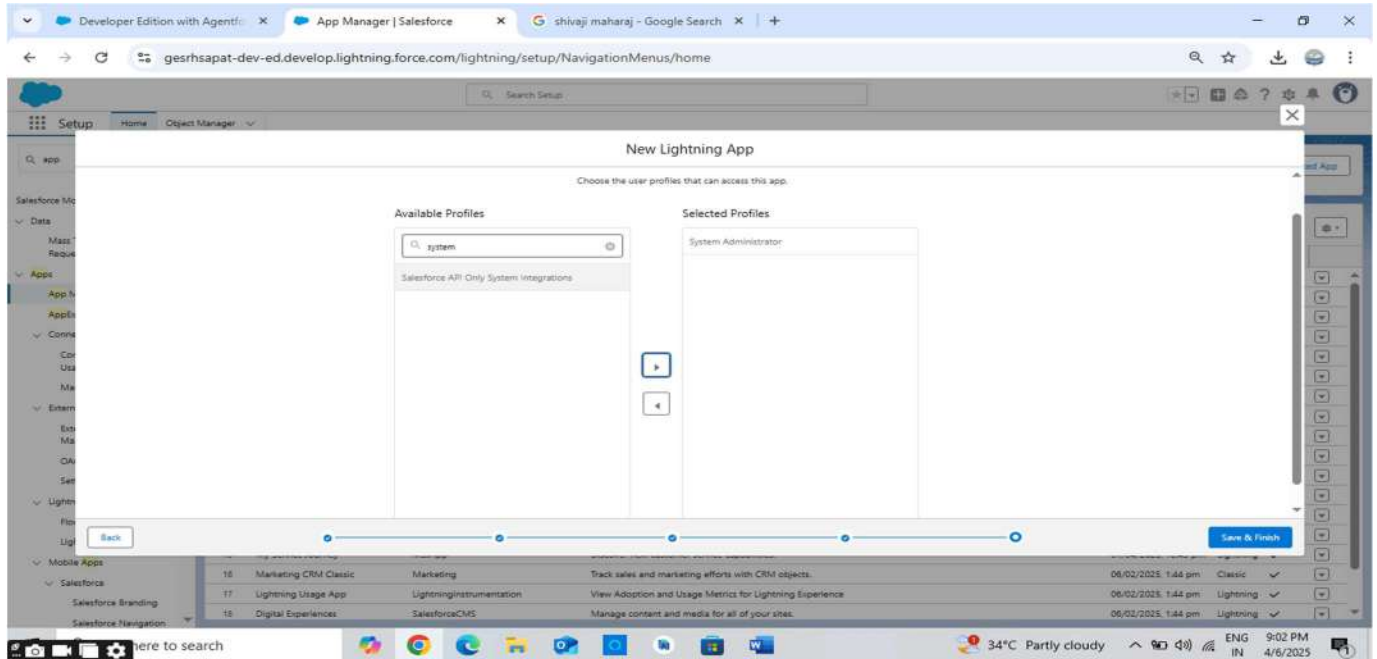

Step-7: Search App Manager in Quick Search and Select App manager

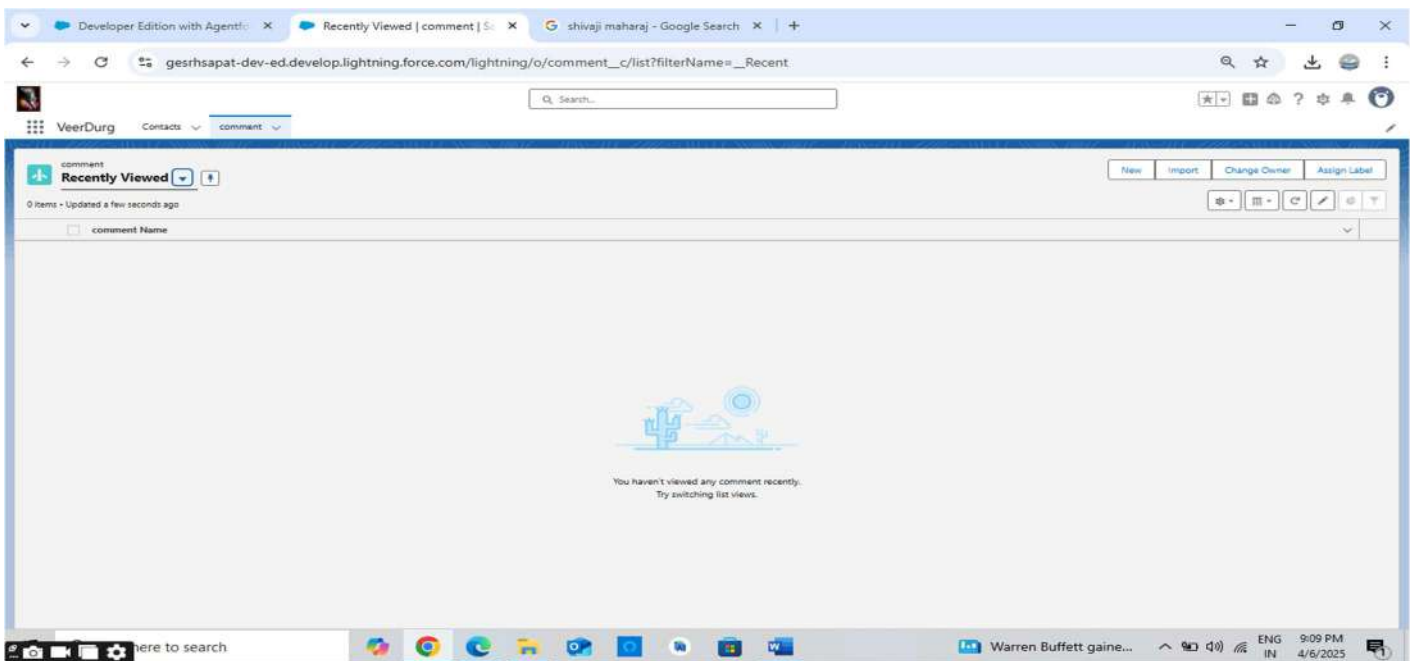

Step-8: Enter name to app name,

- Click on Next-Next-Next,
- Select Items (Contacts,Comment)
- Click on Next.
- Select Profiles (System Administrator) and move to the selected profile.
- Click on Save and Finish.

Step-9: Click on App Launcher Symbol and Select Comment Box App.

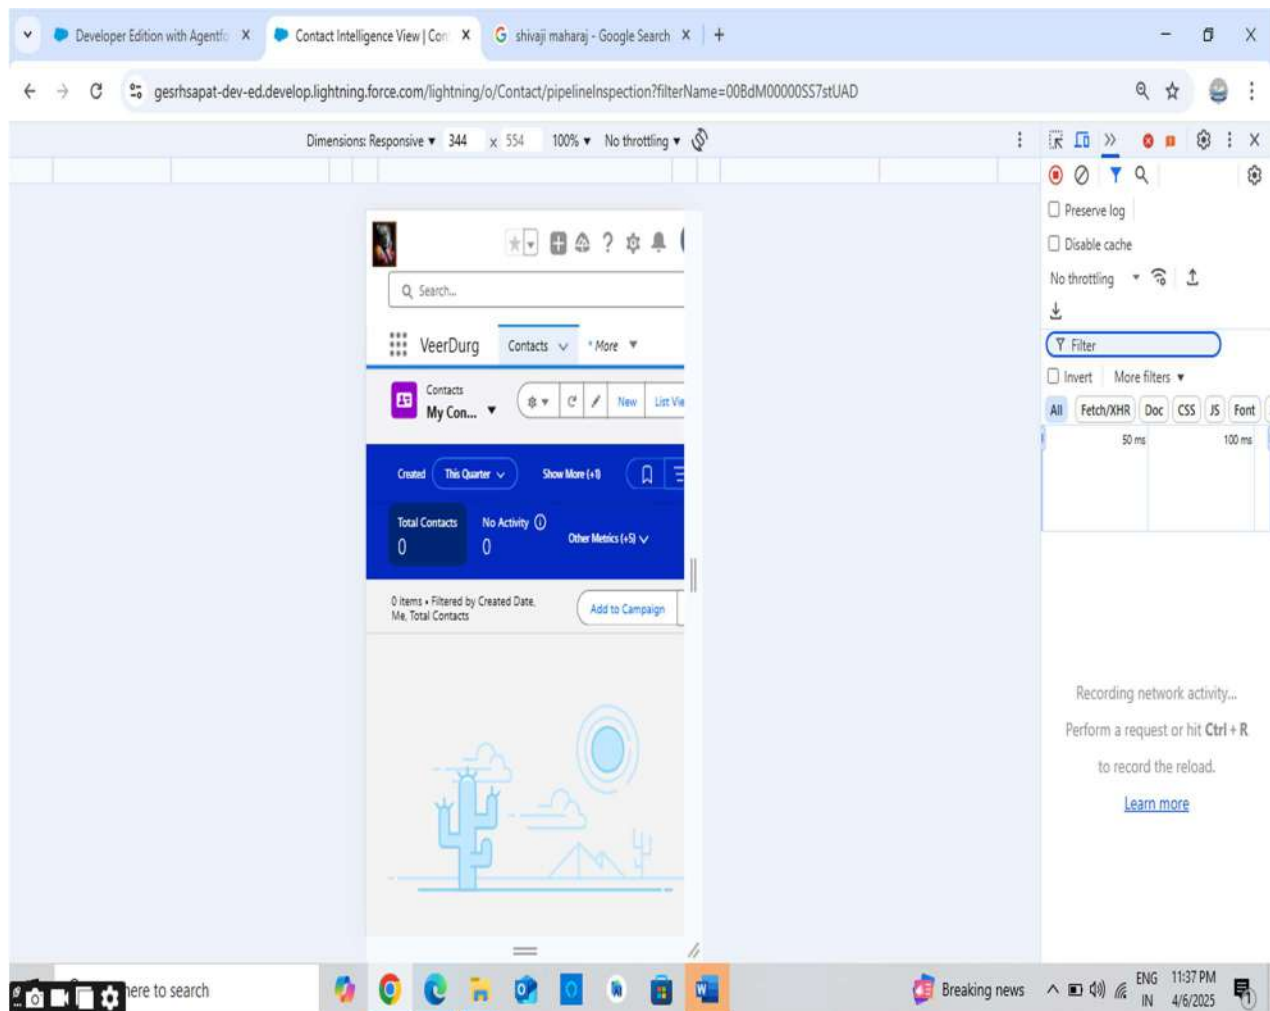

Step-11: Tour the app

Step-12:

- Try out mobile app,
- Select Chrome developer tools,
- Open Chrome-Right Click on Chrome page- Select Inspect, -Click Toggle Device Mode Button to simulate your browser as a mobile device.

- Step-13 -To simulate the sales force mobile app in your browser, copy and paste in url from the previous tab.
- Delete the part of the url immediately,
 - Click on Left navigation bar,
 - Find comment object under recent and click on it,
 - Click new to create a comment.

Conclusion: Hence we have Studied custom Application (Mini Project) using Sales force.
